

SITE PREPARATION & CONCRETE PLACING

DRIVE UNITS FDU SERIES

Flextool® Drive Units are fitted with a quick action coupling for quick and easy connection of a wide range of flexible shaft submersible pumps and concrete vibrators. They are available with petrol or diesel engines to suit any specific job site requirement.

FLEXTOOL DRIVE UNITS ARE COMPATIBLE WITH ALL FLEXSHAFT PUMPS AND CONCRETE VIBRATORS FITTED WITH A 3-TOOTH DRIVE COUPLING.

Lifting hook for easy and safe onsite handling.

Durable heavy duty motor protection frame.

Heavy duty rubber mounts for vibration isolation (excludes Standard FDU-P1 model).

Dished steel base for easy mobility over concrete reinforcing mesh (Standard FDU-P1 and Super FDU-P2 models only).

Honda 4-stroke engine for hassle free operation and low engine emissions (petrol models only).

Super Drive Unit FDU-P2

POWERED by
HONDA.

DRIVE UNITS

Standard FDU-P1

Diesel FDU-D2

Super FDU-P2

Heavy Duty FDU-P3

Heavy Duty FDU-DE2

Petrol Drive Units POWERED by **HONDA**

Petrol drive units are available with Honda four-stroke motors. An oil level sensor is fitted to protect the motor from a lack of crankcase oil.

Diesel Drive Units **YANMAR**

Diesel drive units are ideal for unattended operation and long term reliability. Available in both recoil or key start for easy operation.
